OOTB Device Management

What if you would like to not only control the data bundle, but all the devices and its services?

Technacy has closed a partnership with the ACS / TR-069 market leader company **Axiros**. Axiros has developed an effortless device management tool (AX69), a single platform available in cloud or on-premise, and built a Technacy specific setup that complements our Netmon offering with:

01	**02**	**03**	**04**
CONTROL YOUR DEVICE FLEET	MANAGE THE FIRMWARE AND CONFIGURATION OF THOSE	PERFORM SUFFICIENT LEVEL OF DIAGNOSTICS	FOR ALL DEVICES GIVEN FUNCTIONALITY
Know your devices, their location and status at any time	Get insight on versions installed, schedule and monitor all upgrades	Realtime updates on connectivity status and service quality; performance tests and device control	Internet access, telephony, network and wifi settings

NETMON + AX69

The integration of the two products, **Netmon** and **AX69**, provides complete control of SIM and device data traffic and management.
